Introduction

Workplace Safety & Insurance Board

Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

#### INTRODUCTION

#### a. 2012 Premium Rates Summary

The Workplace Safety and Insurance Board (WSIB) Board of Directors confirmed in June that premium rates for all employer rate groups will increase by two per cent on January 1, 2012. This increase, previously announced after consultations with stakeholders in September 2010, will contribute to the long-term financial stability of Ontario's workplace insurance system.

The average premium rate has not been raised in four of the past seven years, with only modest increases in the others. The 2012 average premium rate will be \$2.40 per \$100 of insurable earnings, an increase from \$2.35 in 2011. The 2012 average rate is still well below the \$3.00 employers were paying in the mid-'90s.

An average premium rate increase is a vital part of any strategy to address the UFL. The two-per-cent increase in the average rate is the minimum necessary to stabilize the system's finances while the Harry Arthurs review of the system's finances completes its work. For information about the Harry Arthurs review visit wsibfundingreview.ca.

The WSIB continues to work with its Chair's Advisory Committees, which represent employers and injured workers from the various industry sectors. These committees have provided valuable advice and guidance to the WSIB Chair, President and CEO, and Executive Committee; and their input was taken into account as part of the decision-making process on which the 2012 premium rates were based.

#### b. The Role of the Workplace Safety and Insurance Board (WSIB)

The WSIB helps workers deal with the consequences of workplace injuries and illnesses – providing a comprehensive bundle of insurance benefits and helping them recover and return to work. The WSIB:

- Promotes health and safety in workplaces to prevent and reduce the occurrence of workplace injuries and occupational diseases
- Assists in the return to work and recovery of injured and ill workers
- Provides benefits to injured and ill workers and to the dependants of workers who have died as a result of a workplace injury or illness

The WSIB is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *Workplace Safety and Insurance Act*, 1997 (WSIA). The Ministry of Labour is responsible for administering the *Occupational Health and Safety Act*.

Section 1 - © WSIB Ontario

The WSIB receives no government funding. WSIB premium revenue must cover all costs associated with both new and existing claims. Revenue is also raised through returns on invested assets and revenue in excess of 7% is available to reduce the UFL.

Employers covered by the WSIA, are divided into two groups, referred to as "Schedule 1" and "Schedule 2." Schedule 1 employers are insured under a "collective liability" system, and are required to contribute to the WSIB Insurance Fund. Schedule 2 employers are "self-insured," and are individually liable for the full costs of their workers' WSIB claims. The WSIB pays insurance benefits for Schedule 2 workers and is reimbursed by Schedule 2 employers for costs (including administrative costs) of the claims.

This Premium Rates Manual pertains to Schedule 1 employers only.

#### c. Funding Review

The WSIB's projected UFL – the difference between payments for future benefits to workers and funding received from business – has risen due to low premiums, rising claims costs and declining investment returns following the recent economic downturn. Right now, the fund is only large enough to cover about half of the projected costs in the system.

A Funding Review to ensure the long-term financial stability of the WSIB is being chaired by Professor Harry Arthurs, former Dean of Osgoode Hall Law School and President Emeritus of York University. The WSIB is dedicated to being open and transparent about this third-party review process and its findings.

The Funding Review has established dialogue and sought input from employers of all sizes, from workers and unions, and from other interested parties, on a range of public policy issues relating to the WSIB's financial future. This includes appropriate funding levels for the WSIB, a timeline for eliminating the UFL, and the current premium-rate-setting methodology.

Through this dialogue and evaluation of alternatives, the Funding Review aims to build consensus around the best path to follow and to inform WSIB strategies moving forward. The Review's report is due out in early 2012.

#### d. Derivation of the 2012 Premium Rates

The Schedule 1 costs of the workers' compensation system are funded through premium rates, which are applied to the payroll of Schedule 1 employers. All Schedule 1 employers are not charged the same rate. Rather, for the purpose of charging them on an equitable basis, employers are classified into rate groups. Rate groups are defined in a classification scheme and each rate group has a different premium rate, reflecting the inherent risk of the specific business activities of industries insured within that group.

The classification scheme divides business activities into nine broad classes, which are further subdivided into 154 rate groups based on similarity of business activity and relative risk. Information about changes to the WSIB classification scheme can be found in Section 8 of this manual. Additional details about the classification scheme itself can be obtained from the WSIB's *Employer Classification Manual (ECM)* on the WSIB website, www.wsib.on.ca.

For each of the classes and rate groups defined in the classification scheme, the WSIB derives a premium rate to cover expected costs relating to the upcoming 2012 premium year. These costs include:

- The expected future lifetime costs to pay benefits and claims-related administrative expenses associated with all new claims for the premium year;
- b) The WSIB's expenses to administer the WSIA, the Ministry of Labour's expenses to administer the Occupational Health and Safety Act, the Workplace Safety and Insurance Appeals Tribunal, Offices of the Employer Advisor and the Worker Advisor, and the expenses of the Safe Workplace Associations and research; and
- c) Past claims cost, including charges:
  - to retire the WSIB's unfunded liability;
  - for gains and losses, which take into account the actual claims cost experience
    of a class, as compared to what was originally priced for specific injury years. For
    the 2012 premium rates, the gains and losses component reflects actual
    experience for injury years 2005 through 2010; and
  - to cover class level bad debts expense (a recognition of uncollectible premiums on employer accounts, after all avenues for collection have been exhausted) and expected net payout from experience rating /incentive programs.

Premium rates are determined annually. Rates are expressed as a dollar amount per \$100 of insurable earnings, and the change from 2011 as a percentage of payroll costs.

An annual maximum ceiling for average earnings used for determining benefits and premiums is set each year according to the *Workplace Safety and Insurance Act*. The ceiling for the premium rate year (2012) is based on 175% of the average industrial wage for Ontario from the most recent published Statistics Canada earnings data available on July 1st of the previous year (2011). The 2012 maximum insurable earnings ceiling is \$81,700, an increase of 2.6% over the 2011 ceiling of \$79,600.

Although all rate groups had their 2012 premium rates fixed at 2% above their 2011 rate, the nine industry classes play a significant role in rate setting. The class level is where certain costs are projected using data and assumptions particular to each class. After the class estimates have been determined, estimates are derived for the rate groups of each class. The 2012 premium rates are based on a projection of claims experience and insurable earnings data from the most recent six years – that is, for the period from 2005 through 2010 inclusive.

There are many assumptions used when determining premium rates for the classes, including assumptions that relate to the economy. For instance, changes in the level of employment and earnings of a class are two factors that can influence the insurable earnings estimate for the class. The WSIB bases its assumptions of future insurable earnings on sector-specific information received from organizations such as Informetrica\*, modified with input from other WSIB sources.

The WSIB's class-by-class forecast economic assumptions (as determined in March 2011) are shown below.

<sup>\*</sup> Informetrica is a privately-owned Canadian company specializing in quantitative economic research. Its products and services provide comprehensive coverage of Canadian economic prospects and public policy.

Economic Assumptions Supporting the 2012 Premium Rates				
Class	Earnings Growth 2010-2011	Earnings Growth 2011-2012	Employment Growth 2010-2011	Employment Growth 2011-2012
Class A: Forest Products	-0.9%	1.6%	-2.1%	-1.7%
Class B: Mining and Related Industries	1.1%	1.0%	2.1%	2.3%
Class C: Other Primary Industries	-0.3%	0.5%	-1.1%	0.7%
Class D: Manufacturing	2.3%	2.0%	0.9%	-0.4%
Class E: Transportation and Storage	0.4%	1.5%	0.5%	1.5%
Class F: Retail and Wholesale Trades	3.2%	1.7%	1.3%	1.6%
Class G: Construction	-0.1%	-4.1%	-0.2%	7.9%
Class H: Government and Related Services	2.4%	2.5%	1.1%	2.4%
Class I: Other Services	4.8%	1.8%	1.3%	0.5%
Schedule 1	2.5%	1.5%	1.0%	1.4%

#### e. Classification Scheme and Data Sources

Schedule 1 employers are divided into nine classes (denoted by class codes A through I). Employers within each class are then subdivided into rate groups. The grouping of employers within a single rate group is based on similarity of business activities and/or relative risk. The number of rate groups in each class varies according to the size of the economic sector covered by each class. For example, Class B: Mining and Related Industries, contains four rate groups, whereas Class D: Manufacturing, contains 73 rate groups.

Rate groups are further divided into classification units. Classification units are used as a means of tracking the relative experience of various employer subgroups. Firms in a classification unit share similar business activities, risks or other characteristics. All employers within a single rate group, no matter which classification unit they belong to or their payroll size, are charged the same premium rate (before any merit adjustments or experience rating). Premium rates are not calculated for classification units.

The classes referred to in this manual should not be confused with industry sectors, which is another categorization used by the WSIB to compare common business practices and approaches.

The figures shown in the Supporting Documentation sections of this manual are based on the data available as of June 2011. Employers may obtain more recent information by contacting the WSIB (see Section 11 of this manual for contact information).

SECTION 2

Definition of 2012 Premium Rate Components

Workplace Safety & Insurance Board Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

#### DEFINITION OF 2012 PREMIUM RATE COMPONENTS

#### A. New Claims Cost

1. New Claims Cost The estimated full cost of new claims for injuries expected to occur during 2012

#### B. Overhead Expenses

1. Administrative Expenses Expenses of the WSIB estimated for the year 2012, to administer the WSIA

2. Legislative Obligations Expenses the WSIB is required to fund under the Occupational Health and Safety Act, the Workplace Safety and Insurance Appeals Tribunal, Office of the Employer Advisor, Office of the Worker Advisor, and research

3. Prevention Expenses for the Safe Workplace Associations (SWAs) estimated

4. Total Overhead Expenses Total of Administrative, Legislative Obligations, and Prevention expenses

#### c. Past Claims Cost

1. Unfunded Liability Payment required to retire the unfunded liability

2. (Gain)/Loss Adjustment reflecting the difference in actual vs. expected claims cost experience for injury years

2005 through 2010

3. Bad Debts/ER Charge to cover bad debts due to uncollectible premiums owing on employer accounts and expected net payout from experience rating /incentive programs

/ incentive programs

4. Total Past Claims Cost Total of Unfunded Liability, (Gain)/Loss, and Bad

Debts/ER

Section 2 - © WSIB

7

#### D. Premium Rate

Total cost per \$100 of insurable earnings required to fund new claims, overhead, and past claims

SECTION 3

Summary of Allocation Rules

Workplace Safety & Insurance Board

Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

## SUMMARY OF ALLOCATION RULES FOR 2012 PREMIUM RATES

#### A. New Claims Cost

New claims costs are determined at the class level. However, rate groups belonging to a class pay them.

The share of the class new claims cost charged to a member rate group is based on the expected number of claims, the average cost of a claim expected for that rate group and a loading for future claims administrative costs of new claims for the premium year.

The average cost of a claim for a rate group is determined via a Cost Index, which indicates the relative costliness of an average claim for the rate group as compared to the cost for its class.

#### **B. Overhead Expenses**

Overhead expenses are allocated to rate groups in proportion to their new claims cost and insurable earnings.

Rate groups covered by a particular Safe Workplace Association (SWA) pay a proportionate share of the expenses of that SWA.

#### C. Past Claims Cost

#### 1. Unfunded Liability

The Unfunded Liability (UFL) charge is determined for Schedule 1 as a collective whole. However, rate groups pay it.

The share of the UFL charge paid by rate groups is in proportion to their new claims cost.

#### 2. (Gain)/Loss

Gains and losses are determined at the class level and spread over a period of six years. If the actual claims cost experience of a class was better than its expected experience then a gain is generated for that class. Conversely, when the actual experience was worse than expected, there is a loss. For the 2012 premium rates, gains and losses are based on injury years 2005 through 2010.

A gain results in a reduction in premium rates while a loss results in an increase.

The gain or loss of a class is allocated to its rate groups in proportion to their new claims cost.

#### 3. Bad Debts and ER

Bad Debts and ER charges are determined at the class level based on experience from recent years up to 2010.

The share of the Bad Debts and ER charge paid by rate groups is in proportion to their premium.

SECTION 9

Non-Credible Rate Groups

Workplace Safety & Insurance Board

Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

## NON-CREDIBLE RATE GROUPS

Ideally, each rate group defined in the Workplace Safety and Insurance Board's classification scheme should be credible, that is, large enough so that reasonably reliable estimates can be made for deriving premium rates from a rate group's own claims experience. Although this is generally the case, particular industries or services in Ontario can decline substantially as the economy undergoes changes and this can lead to a situation where a previously credible rate group becomes non-credible. In addition, some rate groups have reduced the number of injuries to a level where there is not enough information available to estimate the average cost of a claim and, as a result, the rate group becomes non-credible. As part of the ongoing activity of rate making, the Workplace Safety and Insurance Board (WSIB) monitors the credibility of rate groups.

When the WSIB is concerned that a particular rate group has become non-credible, and is likely to remain non-credible, the WSIB may decide to remove such a rate group from the classification scheme through some form of rate group merger, as of a specified date. Employers in the affected industries or services would continue to be insured, but under another rate group.

Since the original development of the WSIB's current classification scheme, which was introduced in 1993, a number of rate groups have become non-credible. Different approaches have been used to address the issue of non-credibility, depending on the circumstances of each rate group.

Data supporting the 2012 premium rates shows that under current criteria six rate groups are not fully credible.

It is possible that the experience of some of the non-credible rate groups may return to a fully credible level, eliminating the need for additional review. However, it is expected that for some of these rate groups, the lack of credibility would need to be addressed more formally by the WSIB, possibly through reclassifications or rate group mergers.
